**THE ONLY ONE STOP SHOP FOR ALL YOUR
GRAFFITI REMOVAL SUPPLIES IN AUSTRALIA**

INTRODUCTION

Dear Customer and Friends,

My name is John Rose. I have worked passionately in the graffiti removal industry for the past 40 years, as owner of a graffiti removal business and developer of The World's Best Graffiti Removal Products and System.

THE WORLD'S BEST GRAFFITI REMOVAL SYSTEM is guaranteed to be the QUICKEST and SAFEST graffiti removal system in the world, It is easily learned and employs only biodegradable products and environmentally sustainable techniques.

Much of our product development has taken place in the arid climate of Australia, where we have reluctantly become accustomed to severe water restrictions. This is why our products require little or no rinsing with water and are now accepted for use by Heritage and World Wilderness areas.

Manufactured locally and exported worldwide, we are proudly used in over 1000 cities, as well as the most successful graffiti removal contracting teams in the world.

We are passionate about providing you with TOTAL answers to graffiti removal cleaning problems. We've been doing it for many years with amazing success. How about joining us in making it GAME OVER for vandals?

There's strength in numbers.
Together we can do it.

John Rose
Founder and Developer
World's Best Graffiti Removers

John Rose, Founder and Developer

Lachlan and Andrew Williams
Directors of Australian Operations

"We thought we tried everything until World's Best turned up. Now we've been using these products since 2007 and I can honestly say World's Best is TRULY the World's Best."

Michael Stover
Nuisance Abatement Coordinator
Department of Public Works
District of Columbia (Washington DC)

ADVANTAGES OF USING WORLD'S BEST

- ✓ Remove graffiti from ALL building surfaces without damage to the substrate, the environment or the end user.
- ✓ No shadows, no choking fumes, no harsh scrubbing or blasting required.
- ✓ All BIODEGRADABLE products require ¼ of the water than others for an even better result.
- ✓ Easily learnt and easily taught 3 PRODUCT SYSTEM... Does the lot!
- ✓ Products works first time, every time. Worker satisfaction is increased through fast and efficient results.

"With 18¼ years experience with the City of Carlsbad, I thought that I had a PhD in graffiti removal, until we used the World's Best Graffiti Removal Products. These products opened our eyes! The paint disappeared, like magic! We had been doing it backwards. We don't need to re-invent the wheel - World's Best have already done it. Luckily we accepted their invitation for a demonstration, because if we hadn't, we would be looking pretty stupid right now."

Mr Tim Lynch

WORLD'S BEST GRAFFITI REMOVERS GRAFFITI KITS

Used by thousands of volunteers to remove hundreds of thousands of tags. These kits are perfect to be handed out to residents or volunteers for your communities 'Clean Up' campaign. Prevent the spread of graffiti vandalism economically, by mobilizing residents and volunteers in your community.

A million thanks for all you're doing to help make things better!"

Ms Harriet Marx (Chairperson)
Looking Good Santa Barbara, CA

GRAFFITI REMOVAL PRODUCTS

BARE BRICK, STONE AND MASONRY GRAFFITI REMOVER

Highly effective, economical and BIODEGRADABLE graffiti remover for bare brick, stone and masonry applications. Removes all types of spray can paints from all porous stone and concrete surfaces, including cinderblock, split face block and exposed aggregate. Rinses easily with no residue.

Safe and effective to use on all types of natural stone (such as limestone, granite and marble), stainless steel, trees, plastics and playground equipment.

Generally applied by brush, or sprayer and best rinsed with a small pressure washer. It has an incredibly consistent 98% success rate with one application. Alternative uses include removal of oil and latex based overspray stains left from paint spills, oil stains on concrete, and smoke damage removal applications.

1 litre will remove approx. 5 sq mtrs (of typical graffiti) on concrete, brick, block or masonry surfaces.

Item Code

- 1 Litre - BB1
- 5 Litre - BB5
- 10 Litre - BB10
- 20 Litre - BB20
- 25 Litre - BB25

SENSITIVE SURFACE GRAFFITI REMOVER

Highly effective, economical and BIODEGRADABLE graffiti remover for painted and sensitive surface applications. Completely removes felt pen, wax crayons and spray can paints from painted and sensitive surfaces.

Ideal for the removal of spray can paints, felt tip markers, permanent markers, crayons, ballpoint pens and other marks from: painted and coated walls, signs, chairs, whiteboards, newspaper dispensers, restroom dividers, desks, Australia post drop boxes, commercial/ real estate/ road signs, signal control boxes, playground structures, cars, trucks, trailers, equipment, bus stops, powder coat, plastics and acrylics plus many more.

Apply the remover by using a small nylon bristled paint brush onto small areas of graffiti at a time. Agitate with the tip of your brush as if you were writing with it. When the graffiti has dissolved, wipe the area clean with a damp cloth. Longer dwell times may be required for removing stubborn graffiti.

1 litre will remove up to approx. 50 sq mtrs of typical

Item Code

- 1 Litre - SS1
- 5 Litre - SS5
- 10 Litre - SS10
- 20 Litre - SS20
- 25 Litre - SS25

The results of using Sensitive Surface on painted surfaces speak for themselves.

FELTPEN FADEOUT

A world first, enabling the removal of permanent ink markers (that have impregnated or left a stain) from paint work, plastics, pre cast concrete, granite, terrazzo, stone and marble. People won't believe what they see in front of their eyes, and neither will you - we guarantee it.

Feltpen Fadeout is a biodegradable, brush on, wipe off product used for the removal of ink stains on smooth or porous surfaces, after (or during) graffiti has been dissolved as much as possible by either Bare Brick, Stone & Masonry Remover (BBSM), or Sensitive Surface Graffiti Remover (SSGR).

This product is extremely useful for the removal of certain spray can stains especially 'reds' from concrete and masonry.

1 litre will remove up to approx. 10 sq mtrs of typical ink and dye stains when used in conjunction with BBSM or SSGR.

Alternative uses include removal of eggs on signs and 'dusties' (which are caused by taggers pushing in grease and grime into painted walls).

Water down 20:1 for general building wash down and organic stain removal from plants/algae and mould.

Item Code
 1 Litre - FF1
 5 Litre - FF5
 20 Litre - FF20

First, dissolve what you can using 'Bare Brick' Stone and Masonry Graffiti Remover.

Then brush on Feltpen Fadeout and leave on while the remaining stain fades away. Rinse away once complete.

GRAFFITI REMOVAL PRODUCTS - SPECIALTY REMOVERS

HERITAGE GRAFFITI REMOVER - FOR DELICATE OLD BUILDINGS

Specially designed for sensitive, historic and important buildings to remove graffiti from stonework, brickwork and masonry without damage.

We have spent over 30 years removing paint carefully from over 10,000 buildings. We have recognized the risk of damage from over zealous blasting or chemicals being entrapped within the surface fabric.

This product is effective first time, every time requiring very low pressure to remove softened graffiti and most importantly, allowing any chemical to rinse out easily to avoid the presence of insoluble salts being left on masonry.

1 litre will remove up to approx. 5 sq mtrs of typical graffiti on Bare Brick, Stone or Masonry.

Item Code
1 Litre - HER1
5 Litre - HER5
10 Litre - HER10
20 Litre - HER20

ECO GREEN GRAFFITI REMOVER

For the quick and safe removal of thicker graffiti from brick, stone and masonry surfaces. Also ideal for removing graffiti paintovers, acrylic paint, paint bombs and paint spills.

Eco Green will remove all types of paints from porous stone and concrete surfaces including cinderblock, split face block and exposed aggregate. Safe to use and virtually odorless. Highly effective on all types of natural stone (such as limestone, granite and marble), stainless steel, trees, plastics and playground equipment.

Eco Green is an ideal hot weather graffiti remover designed to stay wetter, longer and keep working in hotter temperatures.

1 litre will remove approx. 7 sq mtrs of typical graffiti tagging or up to approx. 5 sq mtrs of acrylic paint (depending on the number of coats).

Uses include removal of larger tags sprayed up with fire extinguishers or super soakers, and for the removal of unwanted or vandalized murals and coatings.

“Before I discovered World’s Best Graffiti Removers we had no choice but to cover over graffiti. Now our mission is to restore every surface to its original condition without damage. When you’ve tried World’s Best..... Why try the rest!”

Mr John Thornton - Graffiti Blasters, Adelaide

TRANSGEL GRAFFITI REMOVER - FOR THICK OLDER PAINTS

Highly effective, economical and biodegradable graffiti remover for older, hardened and sunbaked spray cans from masonry, metal, asphalt and timber surfaces.

Recommended for the removal of graffiti from road surfaces including asphalt, tarmac or bitumen without degradation of the road surface. Can be used on unpainted metals and pre-painted steel fencing.

Transgel will remove hard sunbaked murals on trains left in yards and thicker spray can and acrylic murals from buildings. Transgel is particularly useful for removing white and yellow spray cans.

1 litre will remove up to approx. 3-5 sq mtrs.

Item Code

1 Litre - TG1
5 Litre - TG5
20 Litre - TG20

Watch Transgel magically make the paint crinkle before your eyes

Pressure wash away easily

OLD BUILDING PAINT REMOVER - FOR DELICATE OLD BUILDINGS

A specialty paint remover for thicker paints on old buildings, removes up to 3mm thick of old oil based paints in one application, used on thousands of buildings so far with spectacular results.

1 litre will remove up to approx. 4-5 sq mtrs.

Item Code

15 Litre - OB15

“Using World’s Best Graffiti Removers and gentle techniques have enabled us to be trusted with cleaning national treasures like Parliament House and Flinders Street Station. These are Heritage buildings and need special care.

Mr Jorg Winkels - Graffiti Wipeout, Melbourne

WORLD'S BEST GRAFFITI COATING

Bowden Train Station, Adelaide

Protects against graffiti, grime, pollution, sea and salt spray for up to 10 years. This product is a virtually invisible sacrificial ANTI GRAFFITI Coating made from wax polymers and can be applied to almost any exterior building surface but is most suitable for all types of natural or porous surfaces such as brick, stone, masonry, wooden fences, marble, terrazzo, exposed aggregate etc.

Removing graffiti off coated surfaces with pressure hot water

MURALSHIELD

MuralShield is designed for the conservation, restoration, and preservation of fine art and acrylic murals. It reinforces paint layers (consolidates), and provides UV protection and weatherproofing.

MuralShield protects new murals from vandalism and deterioration when used in conjunction with World's Best Graffiti Coating.

Developed by SPARC (Social and Public Art Resource Center) of Venice, California, MuralShield has been used extensively on many landmark and historic murals throughout the country including the world's longest mural in Los Angeles, CA.

MuralShield consolidates chalky or weather worn pigments to form an enhancing 'as new' look, and will restore color, to faded or sun damaged murals that may have been previously protected but have deteriorated slightly from age.

One main advantage of using this product, is that the mural can be painted over, touched up, or hanged after the application process. MuralShield can then be reapplied to consolidate new paint layers.

MuralShield is also ideal for the preparation of painted or uncoated walls before painting a mural. Clear and vibrant lustre to glossy finish.

1 litre will cover approx. 10-15 sq mtrs.

See data sheet for further details

- Dual front part of lance
- Proudly Australian made

PACKAGE INCLUDES

- Spitwater Pressure Washer
- Back Part Gun & Lance
- Double Lance (800mm)
- 10 Metres High Pressure Hose

After visiting over 1000 cities, we've observed **12 steps** for a graffiti-free city.

1. Recognise that graffiti vandalism is a community problem, and unless the City budgets for it out of taxpayers' money then it will never be eradicated. It is no longer possible to avoid this fact.
2. Recognise that graffiti removal is a highly skilled trade. Do not think of it as a menial cleaning type job. Technicians are called upon to repair damaged property from anything and everything without trace or damage. They must be skilled and have a good sense of detailed workmanship.
3. Employ a proven cleaning 'system' which is non damaging and has the ability to confidently work on any surface. We have that proven system.
4. Put all monetary resources into eradication while initially refraining from photographing graffiti. If your local area has been continually vandalised over several years it's likely you will achieve nothing in this quest as most vandals are no longer active. Save this for police / prosecution purposes once you are graffiti-free.
5. Make a daily 'clean-sweep' of all-main roads and known problem areas e.g. skate parks, toilet blocks, parks and known vandal haunts.
6. Remove graffiti from anything and everything, not just city property. Do not leave it to other utilities. Do not leave any obvious graffiti. At first, just clean to 'drive-by' standard, i.e. not visible when driving through an area. You can always return and fine tune any removals.
7. As the daily prevalence of graffiti hits disappear, clean the side streets, while keeping a daily check on the main streets. Clean some areas twice daily if needed. This will deflate the vandal's spirit. Endeavour to be proactive and not reactive (unless the situation requires you to attend to an offensive graffiti incident).
8. Ensure any 'Community Art' program involving aerosol art as the main medium is postponed until after you've attained 'Graffiti-Free' city status. (Art programs performed during clean up campaigns involving aerosol art tend to lower the morale of those responsible for removing graffiti as well as sending out a mixed message to vandals that it is ok to spraypaint on some walls, but not others).
9. Use this proven system. Do not 'reinvent the wheel' or copy other Cities who have not been successful. This definitely works and is not expensive.
10. A 'Clean City' levy of \$1 per household per month will easily fund this, as well as providing cleaner toilets, BBQs, playgrounds etc.
11. The consequent increase in property values through an improved city will ensure that the rates pay for subsequent years ahead at no extra cost to the community.
12. Enjoy and fun. If you're not having fun.. then you're not doing it right.

**IS YOUR CITY DOING THIS?
IS YOUR CITY USING WORLD'S BEST?**
